

CTx3 Rinse

CTx3 Rinse is designed to specifically control oral environmental factors that lead to a cariogenic biofilm. CTx3 Rinse contains xylitol, fluoride (.05% sodium fluoride), and CariFree's unique, patented pH+ technology to neutralize acidic oral pH. Intended for use by patients to lower caries risk and **maintain long-term oral health**.

Directions

Swish with 10 ml two times daily after brushing and flossing. Do not eat, drink, or rinse for 30 min. after use.
