

CTx4 - Treatment Rinse Instructions

Shake each bottle before use. Using the measuring cup, combine 5 mL of component A with 5 mL of component B (10 mL total). Vigorously swish the combined 10 mL of rinse between teeth for one minute, then spit out. Do not swallow the rinse.

Instruct children under 12 years of age in good rinsing habits (to minimize swallowing). Supervise children as necessary until capable of using without supervision.

Do not dilute. Store below 30 degrees C (86 degrees F). Do not rinse with component A or component B alone.

Do not eat, drink, or rinse for 30 minutes after use. Use once daily.
